Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status of the Claims

1. Claims 1-7, 10-73 are pending in this application according to the amendment filed 2/09/2004.

Drawings

2. This application has been filed with 12 drawing pages, which currently are acceptable for examining purposes.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 are drawn to a system and a method to place advertisements and orders on multiple electronic billboard displays, (note that independent claim 72 doesn't claim displaying specifically on a bill-board; therefore, a display via the Internet or via house-hold TV would read-on the claimed language.

- II. Claims 72-73, 10-23, 30-34, 41-43, 47-65, 69-70 are drawn to a general method to place advertisements and orders online.

- III. Claims 24-26 are drawn to a general method to place advertisements and orders online having a sub-combination of "...wherein the display comprises splitting a display screen into at least two portions and displaying the content on less than the at least two portions..."

- IV. Claims 27-29 are drawn to a general method to place advertisements and orders online having a sub-combination of "...comprising communicating availability of display locations and time to the merchant..."

- V. Claims 35-40, 44-46 are drawn to a general method to place advertisements and orders online having a sub-combination of "...wherein the identifying step comprises creating a database of customers/merchants...".
- VI. Claims 44-46 are drawn to a general method to place advertisements and orders online having a sub-combination of "wherein the display comprises splitting a display screen into at least two portions and displaying the content on less than the at least two portions".
- VII. Claims 66-68 are drawn to a general method to place advertisements and orders online having a sub-combination of "...comprising verifying product availability ...".
- VIII. Claim 71 is drawn to a general system for facilitating the ordering of a product display, as in a mail order business (e.g. <http://www.valuepak.com>).
4. The inventions are distinct, each from the other because of the following reasons: Inventions II, III, IV, V, VI, VII, and VIII are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions III, IV, V, VI, VII, and VIII have separate utilities as having clearly different applications/functions as indicated above. See MPEP § 806.05(d).
5. Because these inventions are distinct for the reasons given above, because the search required for Group I is not required for Group II or Group VIII the inventions have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as

indicated is proper (MPEP §811 allowing restrictions at anytime prior to the application being under a Final Rejection).

6. Should Applicants disagree with the Examiner and find that, as currently claimed, Inventions I, II and VIII are patent ably distinct, Applicants are respectfully requested, in accordance with 37 C.F.R. § 1.111(b), to make his position known to the Examiner in Applicant's next response.

Election of Species

7. This application contains claims directed to the following patent ably distinct species of the claimed invention:

Species A: claims 1-7.

Species B: claims 72-73, 11-70.

Species C: claim 71.

Note that distinct species for indicated claims are explained in part 3.

Applicants are also required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

8. Applicants are advised that a reply to this requirement must include both a choice of invention (i.e., Inventions I-VIII) and an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added in response to this Office Action or in any future amendment. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

9. Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election in response to this Office Action or in any future amendment, Applicants must indicate which newly added claims are readable upon the elected species. MPEP § 809.02(a).

Should Applicants traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention if an election being made.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CUONG H. NGUYEN whose number is 703-305-4553. The examiner can normally be reached on 7am-3:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's acting supervisor, JEFFREY A. SMITH can be reached on 703-308-3588. The fax phone number for the organization where this application or proceeding is assigned is 703-305-7687/703-746-5572.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197.

Please provide support, with page and line numbers, for any amended or new claim in an effort to help advance prosecution; otherwise any new claim language that is introduced in an amended or new claim may be considered as new matter, especially if the Application is a Jumbo Application.
